To report a theft in the UK

The Trackstar S5 system utilises a driver identification system as part of the Thatcham S5-VTS criteria. All systems are supplied with two tags as standard.

On receipt of a recognised tag code the system will authorise the use of the vehicle.

Should the Trackstar S5 system not receive the correct code an alert will be sent to the control desk stating that the vehicle is moving illegally.

The system will automatically arm itself within one minute from when the ignition is turned off. No additional action is required by the user.

ACTIONS TO BE TAKEN IN THE EVENT OF A TAG NOT BEING AVAILABLE

Please call the control room on 0345 604 5433 to advise if the tags have been lost or stolen
